2/20/79

Dear Harold:

While snowed in, I have been catching up on some filing. I came across your 2/5/79 note to Lardner re Mrs. "Tony" Henderson and the two men in the TSBD window. Your note indicates that the HQ file does not contain any follow-up on this lead. However, there was a follow-up, on December 5, 1963, reported on the following day. This FBI report was printed by the Commission at 24 H 524. (CE 2089)

The discrepancies between the two reports are interesting. The telephone lead has her as certain it was the 6th floor. The report of the in-person interview has her uncertain as to the floor, only that no one else was on a higher floor. In the former, the man in the white shirt was the taller of the two; in the latter, he was the shorter. Also, the follow-up is slanted to imply that the two men were those (of 3) on the fifth floor.

H.R.
